Total number of plumbing inspections .....	109

*Smallpox in Chicago, Ill.*

Surgeon Banks reports, October 25, as follows:

There are at present in the city isolation hospital nearly 30 cases of smallpox, gathered from various localities in Chicago, most of them having no known relation to each other in the source of infection. This would indicate a possible and probable large number to follow during the ensuing cold weather. So far no case has occurred among the shipping, but vaccination will be given to all who apply for treatment whenever possible. It is now practiced on all who are admitted to hospital.

The city council appropriated last night the sum of \$15,000 for the use of the health department, and an extra force of inspectors and vaccinators will be employed at once.

*Transactions on account of smallpox in northern Maine, Canadian border—Report of sanitary work in the Madawaska region.*

Acting Assistant Surgeon Hammond reports, through Surgeon Kalloch, as follows:

Week ended October 22, 1904. Cases of smallpox, none; houses quarantined, none; houses disinfected, none; persons vaccinated, none; suspicious cases investigated, 1; miles covered, 5.

*Diphtheria at Lubec, Me.—New cases.*

Acting Assistant Surgeon Small, at Eastport, Me., reports, October 27, as follows:

Since my report of 20th instant on diphtheria at Lubec, Me., 8 new cases have developed, making a total of 14 cases. The disease is confined to school children and is of a mild type with no deaths.

The local authorities are using every effort to stop the epidemic, and quarantine is strictly observed.
